To  
My dear friend  
Mr. Eliahu Yart- chairman  
" Ezrat Holim " organization  
Rehovot

Dear Mr. Yart, I here confirm that I received your request in the issue of special bonus for your respectful organization, and as accepted in this kind of request, it was transferred for examination at the department of welfair in the municipality. I received your request again, this time with warm recommendation from the welfair department.

I was impressed by the wide range of your organization activity with helping patients and their families in variety of important activities as of the training department for " preventive medicine " and " first aid ". I was also glad to see that there are today number of people who suffered from hart problems and were saved by the volunteers from your organization, who got their knowledge in first aid, based on their participation in the courses you are organizing.

The people who perform the " blood donation " operation of the organization in cooropration with the management of " blood service ", who belong to the red " Magen David " organization, should get special appreciation, especially considering the occasunal shortage in the " blood bank ".

I was especially impressed with the opening of the " lodging accomendation " by the Kaplan Medcial Center in our city Rehovot. We received many praises and complements from people who need this kind of important service, when they are compeled to stay near their loved ones in the hospital.

With all that been said, I would be happy if I could also bring for approval a remarkable bonus from the municipality account, with relation to the importance of your activities, and with addition to the regular annual bonus for your daily activities. In this hard times, it is known that the municipality is having difficulties to approve special bonuses, even though you are obviously deserve it.

In this situation, I can only recommend you to turn to trustees and private donators in Israel and abroad in hope that you will get the very urgent and important help you need and well deserve. The municipality and myself included, will do everything we can to assist and recommend you to any one you will ask, so we all will see your organization, that by any doubt is a precious stone in the crown of Rehovot and it's surrounding, continuing the important activities for the glory of the city, people, and the state.

I hope that all those who are involved, and who have the power to assist you, will actualy do that with an open hand according to the importance and value of the issue.

With respect and friendship

  
Shuki Forer  
The Mayor of Rehovot
